

i.MX515 Multimedia Applications Processor

Overview

The MCIMX515 (i.MX515) represents Freescale Semiconductor's latest achievement in integrated multimedia applications processors. This solution is part of a growing family of multimedia-focused products offering high-performance processing optimized for low power consumption.

The i.MX515 processor features Freescale's advanced and power-efficient implementation of the ARM Cortex™-A8 core, which operates at speeds up to 1 GHz.

Features

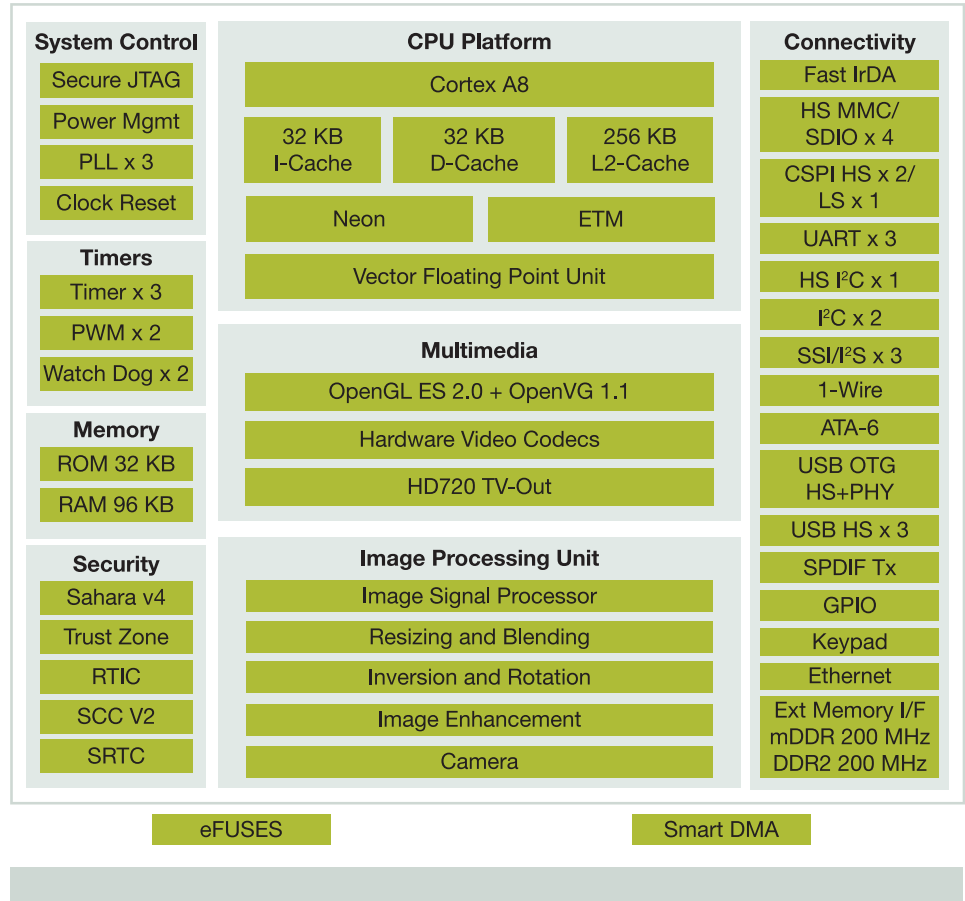

CPU Complex

- 1 GHz ARM Cortex-A8 CPU
- 32 KB instruction and data caches
- Unified 256 KB L2 cache
- NEON SIMD media accelerator
- Vector floating point coprocessor

Multimedia

- OpenGL ES 2.0 and OpenVG 1.1 hardware accelerators
- Multi-format HD 720p video decoder and D1 video encoder hardware engine
- 24-bit primary display support up to WXGA resolution
- 18-bit secondary display support
- Analog HD720p component TV output
- High-quality hardware video de-interlacing
- Image and video resize, inversion and rotation hardware
- Alpha blending and color space conversion
- Video/graphics combining: four planes plus hardware cursor
- Display quality enhancement: color correction, gamut mapping and gamma correction

i.MX515 Multimedia Applications Processor

External Memory Interface

- mDDR and DDR2 SDRAM, 16/32-bit, 200 MHz
- SLC/MLC NAND flash, 8/16-bit

Advanced Power Management

- Multiple independent power domains
- Dynamic voltage and frequency scaling
- Dynamic process and temperature compensation
- Proprietary power gating

Connectivity

- High-Speed USB OTG with PHY
- Three additional High-Speed USB controllers
- Wide array of serial interfaces, including SDIO, SPI, I²C and UART

- I²S and S/PDIF audio interfaces
- 10/100 Ethernet controller
- P-ATA

Security

- Security controller, including secure RAM and security monitor
- Secure high assurance boot, JTAG controller and real-time clock
- Cipher and random number generator accelerators
- Run-time integrity checker
- Universal unique identification
- Tamper detection

General

- 13 mm x 13 mm, 0.5 mm pitch MAPBGA package
- 19 mm x 19 mm, 0.8 mm pitch MAPBGA package
- -20°C to +85°C ambient temperature range
- Automotive temperature grade also available

Benefits

- Very high performance processing and multimedia capabilities
- High level of integration reduces overall system BOM
- Hardware acceleration enables very low power consumption for video and graphics

Netbook/MID Application Processor

i.MX515 processor boosts the capabilities of netbooks and mobile Internet devices with its blazing 1 GHz performance, enabling these devices to deliver a “full-Internet” experience. With Freescale’s dynamic voltage and frequency scaling (DVFS), the same core that runs at 1 GHz can scale down to 200 MHz at reduced voltage. This results in significant power reduction for lower MIPS applications.

Multimedia Powerhouse

The multimedia performances of the i.MX515 processor is boosted by a Multi-Standard Hardware Video Codec, Autonomous Image Processing HD Unit (including Image Signal Processor), NEON SIMD, accelerometer and Vector Floating Point coprocessor, and a programmable Smart DMA (SDMA) controller.

Powerful Graphics Acceleration

3-D graphics are the key to mobile game designs. The i.MX515 processor provides an integrated 3-D graphics processing unit that has been improved over the i.MX31 to provide an incredible 27 Mtri/sec and effective 664 Mpix/sec (with overdraw). In addition, i.MX515 incorporates a 2-D graphics processing unit to accelerate Adobe® Flash® and OS-windowing system functions.

Smart Speed™ Technology

Advanced power management features used throughout the i.MX515 processor enable a rich suite of multimedia features and peripherals while maintaining minimum system power consumption in both active and low-power modes. Smart Speed technology enables the designer to deliver a feature-rich product at much lower power consumption than competing products.

Increased Security

Because the need for advanced security for mobile devices continues to increase, the i.MX515 processor delivers hardware-enabled security features that support secure e-commerce, digital rights management (DRM), information encryption, secure boot and secure software downloads.

Interface Flexibility

The i.MX515 supports connection to all popular types of external memories: Mobile DDR and DDR2, SDRAM, NOR flash, PSRAM, cellular RAM, NAND flash (MLC and SLC) and OneNAND. Designers seeking to provide products that deliver a rich multimedia experience will find a full suite of on-chip peripherals: LCD controller and CMOS sensor interface, High-Speed USB On-The-Go, three High-Speed USB hosts, multiple expansion card ports (High-Speed MMC/SDIO Host and others), Fast Ethernet controller and a variety of additional interfaces (UART, I²C, I²S serial audio, and SIM card and more).

Freescale Multimedia Alliances Network

Combining resources from Freescale and industry leaders, the Freescale Multimedia Alliances Network offers advanced pre-integrated platforms and solutions designed to work out-of-the-box, accelerating your business and giving you a competitive advantage. The Freescale Multimedia Alliances Network is a global program created to bring comprehensive platforms to market that include hardware and software solutions, tools,

systems integration, consulting and other services. With early access to improved tools, Freescale Multimedia Alliances Network members are better equipped to deliver mobile and wireless solutions to a global audience in less time, with less effort and at a lower cost. For more information about the Freescale Multimedia Alliances Network, visit www.freescale.com/man.

The i.MX Family

Freescale’s i.MX family of applications processors delivers power to the people who demand it—designers like you, and users who crave it for their mobile devices. Designers love the amazing performance i.MX processors achieve at low clock speeds, and the high degree of integration that shortens design times. Consumers love the lifelike video and 3-D graphics reproduction, quick response and long, long play times for hours of work or entertainment use. Freescale gives you the power of choice to address all of your embedded designs, from the i.MXS for price sensitive applications, and i.MXL and i.MX21S for mid-range devices, to i.MX21, i.MX27, i.MX31 and i.MX31L for high-performance mobile multimedia devices. The i.MX family supports a range of platforms such as those based on Microsoft Windows® CE and Mobile, Linux® OS, and a number of leading RTOSs.
